

Attention: Computer Engineering Students

Spring 2008 Registration Information

Summary

The recent updating of the Computer Science curriculum and of ENGR 112 has required adjustments to the Computer Engineering curriculum. The information here is relevant for students in Catalog 130 (the current catalog) and earlier in both tracks of Computer Engineering (CECN and CEEN). Please address any questions to your undergraduate academic advisor.

CPSC 111 information

- Do not take CPSC 111. Its place in the curriculum has been taken over by ENGR 112.
- One of the following will be accepted as substitution for CPSC 111 in satisfying your degree plan:
 - CPSC 206
 - Another CPSC or ECEN upper-division elective (4 credit hours required). CPSC 111 is 4 credit hours so if you choose a 4 credit hour elective, the substitution will be direct. However, if the elective chosen is 3 credit hours and if you have taken the required 2 credit CPSC 289 addition to ENGR 112, you will be allowed to combine the elective and the CPSC 289 to satisfy the 4 credit hour requirement.
- If you already have taken CPSC 111, it will count on your degree plan. This includes students taking the special sections of CPSC 111 in Fall 2007.

ENGR 112 information

- Beginning in spring 2007, the four credits of B-track ENGR 112 will be covered in two separate semesters rather than being taught concurrently. Students taking ENGR 112 (2 credits) in the spring will need to take the follow-on course in a subsequent semester. This course is tentatively numbered CPSC 113 (2 credits), and is a prerequisite for CPSC 221.

CPSC 211 information

- Do not take CPSC 211. Instead, take CPSC 221.

CPSC 221 information

- CPSC 221 has a co-requisite of MATH 302; **also register for MATH 302** if you have not already taken it.
- MATH 302's prerequisites have been changed to be MATH 151 and the course is in the process of being renumbered to the 200 level. Consequently, it is an appropriate class for lower-division students.
- You must complete all 4 credits associated with ENGR 112 before taking CPSC 221.

CPSC 311 information

- Do not take CPSC 311 if you have taken CPSC 221; the course content overlaps too much.
- We will accept CPSC 313 as a substitute for CPSC 311. Either CPSC 321 or ECEN 350 will be accepted as prerequisite for CPSC 313.
