

you don't know what you need to know to work here

(none of us do...)

at Optimization, you'll be challenged to **LEARN SOMETHING NEW** on every project you work on **we are a small systems integration company where every project is different** we build test platforms and control systems for the world's largest companies **we solve problems where others have failed** our systems help kids with epilepsy (implantable device testing) and help drillers find oil (directional drilling systems) **we make sure jet engines stay together (blade inspection) and that prisoners stay put (door lock control system for a Mexican prison)** come work **WHERE THE ACTION IS!**

Why did others join Optimization?

"I was tired of doing the same thing every day. Optimization provides VARIETY in my work."

"At a small company I can see where my efforts MAKE A DIFFERENCE immediately."

"I am trusted to get my job done and given the FREEDOM to work when I want to."

"I love to learn new things. Optimization provides the CHALLENGE to keep learning."

"My boss understands that there is more to life than work. He stresses BALANCE."

Info Session - come talk with our staff and see demos from some of our cutting edge projects.

Sunday, October 14, 8:30 PM
